WEATHER INDICATIONS.

Continued fair to-day, followed by show-
ers.

HERE'S some excellent advice from the Frankfort Capital: "There was much kicking against the Legislature that has just concluded its labors. Now is the accepted time to kick against the next one. Kick to-day, to-morrow, every day, until none but the proper men are nominated and elected. The matter is in the hands of the people; if they do not do their duty no one is to blame but themselves."

ALL the manufacturing interests of the South are growing rapidly, says Blue and Gray. "It seems only yesterday that the fires were lighted for the first time in the pioneer furnaces of Birmingham and Bessemer, Ala.; it seems only yesterday that it became noised about that these young cities were destined to rival Pittsburgh and Allegheny in the extent of their production of iron and steel, in at least certain forms. The smile of incredulity which this declaration caused, has hardly faded from the faces of all men yet; but Southern iron and steel are at the front and there to stay, and all manner of Southern manufactured products are now commanding a high place in the markets of the country and of the world."

THE New York Recorder gives a good square meal for meditation in the following words:

"The business health and vigor of the country are asserting themselves with daily increasing effect. The conviction is now everywhere felt, except in a few panicky spots in the far West—where some few persons, like Governor Waite, have lost their heads—that the country is not poor, but rich; that its resources are not scanty but vast; that its credit is not weak but stronger than that of any other Nation in the world; that its banking and business fabric is sound, honest, and able to stand any conceivable strain except that of a mad, senseless panic, and that any panic of that kind will not be permitted in the present temper of the people."

Let the public realize that this is the truth, and keep it constantly in mind, and thereby endeavor to coax that lost or wandering confidence back to its bosom.

David B. Hill in the Senate.

Mr. Hill's influence in the senate is very much greater than is generally believed, though it may not be strong enough for a contention with the administration. In a measure Hill has taken the place of Gorman in the senate. All the friends that Gorman lost in Chicago Hill gained, and this gives him sufficient power in the senate to make himself quite disagreeable to the administration if he desires to do so. The assumption, however, that he is going to put on a coat of war paint and carry a bowie knife in each boot and a brace of six shooters in view does not give sufficient credit to his discretion and skill as a political wirepuller.

Notwithstanding the bitterness of feeling which is provoked by the New York senatorial fight, it may be depended upon that Mr. Hill will not appear in the senate in the attitude of an open opponent of the administration. There is good reason for believing that Mr. Hill will not only decline to pose as the leader of an opposition, but in spite of all the affronts he feels have been put upon him he will support the administration in most matters. Where trouble is looked for by those who are skimming over the surface is with relation to the confirmations. There is a notion of some people that Hill will make a fight at every opportunity. They are probably mistaken. Men who are pretty familiar with the situation and know Hill very well believe that he will follow no such line of policy, but will approve everything and every person passing his test of Democracy.

It is believed the only thing Hill has in view is to stand on guard to prevent the preferment of Mugwumps. His test of party qualifications will not be personal support of himself. But he bates a Mugwump.—Washington Star.

A Supposed Cholera Victim Alive.

In the beginning of September a doctor went from a small German town to Hamburg to assist among the cholera patients. Five days after arriving there news reached his home that in following his profession he had fallen a victim to the deadly disease. His previous thriftless career was immediately forgotten, he was mourned as a martyr and all sorts of laudatory compositions were dedicated to his memory. A lady to whom he had been betrothed was among the mourners.

A sensation has been caused in town now by the news that the young man's mother has received a letter from America in which the son who was supposed to be dead informs her that he is very well, and explains that while at the hospital in Hamburg he had placed his card in the pocket of a man who had died of cholera, and who, resembling him in features, was buried as the doctor.—London News.

"SPEAKING of the low price of wheat," says Mr. John Divine, of Mercer County, to the Harrodsburg Democrat, "in 1855 the crop was the best I ever saw, and there was a reasonably large acreage that year. In the summer the highest price paid for it was 50 cents. However before Christmas of the same year wheat jumped from 50 cents to \$2.50 per bushel and the buyers were eager for it at that price."

Only Cholera Morbus.

The projected institution has already received \$50,000, which will be used for site and buildings and the endowment has almost reached \$100,000.

The phenomenal growth of the Baptists in the United States in the past twenty years is best illustrated by the following statistics: In 1872 there were 1,486,000 Baptists. In 1892 there were 3,269,000. In 1872 they numbered one in every twenty-six of population, now they number one in twenty. While the population has come short of doubling, the Baptists have more than doubled in that time. In 1872 the total amount of property and endowments belonging to Baptists Colleges and Theological Seminaries was \$3,467,000. In 1892 it was \$26,000,000.
